Forecast Summary:

According to the weather forecast received from the Indian Meteorological Department, clear weather appearing in first day and light to moderate cloud cover in remaining days, there is a possibility of light rain on 15 June, 2025. The maximum temperature is between 41.6- 45.0°C, which is likely to be 4-5°C higher normal and the minimum temperature is between 27.0-27.0°C, which is likely to be 1-2°C higher normal. The maximum and minimum range of relative humidity is between 47-97 and 23-46%. Wind direction is north-west, north-east and wind speed is between 2.0-15.0 kmph with gusts expected to be 3-4 kmph high speed than normal.

Weather Warnings (Valid Till 08:30 IST of the next day)

In view of the possibility of light rain and thunderstorms, farmers are advised to complete the harvesting and threshing of the ripe zaid crops as soon as possible and conserve the grains. Spray insecticides, fungicides and weedicides only when the wind is calm/the sky is clear and do not spray insecticides, pesticides and weedicides while standing in the opposite direction of the wind. If possible, hands should be washed thoroughly with soap or hand wash after spraying, before eating and after washing clothes.

Likely impacts of weather warnings on Agriculture and associated Agromet advisories

In view of the possibility of light rain and thunderstorms, farmers are advised to complete the harvesting and threshing of the ripe zaid crops as soon as possible and conserve the grains. Spray insecticides, fungicides and weedicides only when the wind is calm/the sky is clear and do not spray insecticides, pesticides and weedicides while standing in the opposite direction of the wind. If possible,

hands should be washed thoroughly with soap or hand wash after spraying, before eating and after washing clothes.

General Advisory:

In view of the possibility of light rain and thunderstorms, farmers are advised to complete the harvesting and threshing of the ripe zaid crops as soon as possible and conserve the grains. Spray insecticides, fungicides and weedicides only when the wind is calm/the sky is clear and do not spray insecticides, pesticides and weedicides while standing in the opposite direction of the wind. If possible, hands should be washed thoroughly with soap or hand wash after spraying, before eating and after washing clothes.

SMS Advisory:

In view of the possibility of light rain and thunderstorms, farmers are advised to complete the harvesting and threshing of the ripe Zaid crops as soon as possible and conserve the grains.

Crop Specific Advisory:

Crop (Stage)	Crop Specific Advisory
MAIZE (Sowing)	After preparing the field by ploughing it for sowing Kharif maize, arrange for fertilizers and seeds for sowing any one of the improved recommended complex varieties - Kanchan, Gaurav, Shweta, Azad Uttam and hybrid varieties - HMH-3904, PMH-3, NK-61, Prakash, Y-1402, Bio-9681, Pro-316, D-9144, Dikalb- 7074, PHB- 8144, Deccan 115, MMH-133 etc. For sowing complex variety of maize, sow at the rate of 20-25 kg seed/hectare and Shankar variety at the rate of 18-20 kg seed/hectare.
RICE (Nursery/ seedling)	After preparing the field, plant paddy nursery, as well as the advanced varieties Narendra-359, Narendra paddy-2026, Narendra paddy-2064, Narendra paddy-2065, Narendra paddy-3112, Sarju-52, Sita etc. and hybrid varieties- Pro .Agro-6444 (2001)Arise , Prof.Agro-6201 (2001)Arise, PHB-71, Pioneer-27 P 31, 27 P 37, 28 P 67 , RR X-113, Kaveri - 468, KRH-2, US-312, RH. -312, rh. -1531etc and fragrant paddy varieties- Type-3, Pusa Basmati-1, Malviya Sugandh-105, Malviya Sugandha-3-4, Narendra Sugandh and Narendra Usar Paddy-1, Narendra Usar Paddy-2, Narendra Usar Paddy-2008, CLR-10 etc Insert nursery by arranging any one variety of seeds and fertilizers . Light irrigation should be done in the field 15 days before planting the nursery of paddy seeds so that the weeds coming out in the field are destroyed while preparing the field.
MAIZE (Grain filling and Maturity)	Farmers are advised to harvest the mature maize corn and after separating the grain from the broken corn, dry it well in the sun and store it.
BLACK GRAM (Grain filling and Maturity)	Farmers are advised that after harvesting the mature crops of black gram/green gram, separate the grain from the straw by threshing and structure the grain.

Horticulture Specific Advisory:

Horticulture (Stage)	Horticulture Specific Advisory
BRINJAL (Physiological Maturity)	Raise nursery/ sow seedlings of vegetables to be sown in Kharif. This is the appropriate time for nursery of brinjal, chili, early cauliflower and sowing of ladyfinger, cowpea, pumpkin, bottle gourd, ridge gourd, bitter gourd, cucumber etc. Harvest the ready crops of Zaid pumpkin, bottle gourd, bitter gourd, cucumber, watermelon, muskmelon etc. and send them to market. For prevention of fruit borer/leaf borer pest in vegetable crops, prepare solution of neem oil 1.5-2.0 ml/liter in water and spray 3-4 times at

Horticulture (Stage)	Horticulture Specific Advisory
	an interval of 8-10 days. Do weeding in standing vegetable crops and do irrigation work in the evening at an interval of 8-10 days.
MANGO (Transplanting)	Dig pits for planting new gardens. Do irrigation work in orchards of mango, guava, lemon plum, grapes, papaya and litchi etc. Irrigate the orchards to prevent fall of mango fruit or apply 4.5 SL of 20 ml alpha naphthalene acetic acid make a solution per liter of water and spray it. To prevent cuckoo disorder or internal rot disease in mango pods, make borax 0.8% solution in 0.8 g / liter water and spray 2 at 10 days interval.

Live Stock Specific Advisory:

Live Stock	Live Stock Specific Advisory
BUFFALO	Considering the current weather, farmers are advised to tie the animals in the open during the night. Tie the animals in a shade time place during the day. Do not tie the animals under the tree because this week the chances of falling trees twigs are high due to the speed of the winds.
